Memory I II		program: press & hold for 2 sec. usage: press 1x **!** For the Speed Limiter and Cruise Control different memory speeds can be programmed	

Cruise Control

- The Cruise Control can be used from 35 km/h
- Don't use the Cruise Control during bad weather
- The cruise control slows down using engine braking. It does not apply the brakes.
- It’s always possible to accelerate in the interim by pressing the throttle. After that the car will resume the set speed if the speed has not been increased by more than 50% compared to the set speed

The Cruise Control will switch off with:

- Braking
- Pressing the clutch (if connected)
- De-activate
- Switch off Cruise Control
- Decrease speed by 25% compared to the set speed
- Increase speed by 50% compared to the set speed
- Switch off the ignition

Speed Limiter

- The speed limiter can be used from 35 km/h

The speed limiter will switch off with:

- De-activate
- Switch off the speed limiter
- Throttle kick down
- Switch off the ignition
